

SIDDHANTH SADASHIV RAIKAR

Aspiring AI Engineer

+91 8951332718 | siddhanth.raikar2024@nst.rishihood.edu.in | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Applied AI & Agentic Systems Focus

AI/Data Science undergraduate with hands-on experience designing end-to-end agentic AI workflows, multi-agent orchestration systems, and RAG pipelines. Proficient in Python, LangGraph, Scikit-learn, and vector databases (ChromaDB), paired with solid backend API development (FastAPI, Node.js). Looking to apply this production-oriented AI/ML experience as an AI/ML Intern.

EDUCATION

Bachelor of Technology, Data Science

2024 – 2028

Newton School of Technology, Rishihood University | CGPA: 7.64 / 10.0

Intermediate (Class XII) — TLC PU College, Mangalore | 91.0%

Matriculation (Class X) — Sharada Vidyanikethana Public School, Mangalore | 95.6%

AI / ML PROJECTS

EstateX — AI-Powered Real Estate Lead Management Platform ([Github](#)) ([Demo](#))

Python, LangGraph, Google Gemini API, FastAPI, MongoDB Atlas, JWT, Pytest

- Architected a multi-agent orchestration system with LangGraph and the Google Gemini API — a state-machine pipeline with conditional routing and human-in-the-loop interrupts that autonomously qualifies, scores, and nurtures real estate leads.
- Engineered an LLM-driven supervisor agent that delegates work across specialized nodes (qualification, sentiment analysis, follow-ups), with async checkpointing and persistent memory via MongoDB Atlas.
- Shipped a production-grade FastAPI backend — 138+ automated tests, JWT authentication, deployed across Vercel and Render with CI/CD.

GemTrack — Full-Stack POS & Inventory Platform ([Github](#)) ([Demo](#))

November 2025

Next.js, React, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, GoldAPI

- Built a production full-stack POS and inventory system for active jewelry retail users, integrating real-time GoldAPI market pricing into live billing and settlement.
- Optimized server-side search and data pipelines to handle 10,000+ inventory items with live purity, weight, and HUID tracking.
- Delivered a CRM and analytics layer with detailed customer profiles and sales logs to support data-driven business decisions.

Wraft — AI-Powered Chatbot SaaS Platform ([Demo](#))

Next.js, FastAPI, Supabase, Redis, Gemini AI

- Built a multi-tenant SaaS platform enabling businesses to create custom AI chatbots trained on their own data (PDFs, URLs, sitemaps), with RAG-based retrieval, vector similarity search, and automated knowledge-base retraining via cron pipelines.
- Engineered real-time chat across web widget and WhatsApp (Meta Cloud API) channels, with conversation analytics, lead capture, usage-based billing via Razorpay, and quiet-hour-aware owner notifications.
- Implemented a full ingestion pipeline (extraction → chunking → embedding → vector storage) with Gemini embeddings, Redis-backed response caching, rate limiting, and an admin analytics dashboard.

Intelligent Exam Question Analysis & Agentic Assessment Design ([Github](#)) ([Demo](#))

Python, Streamlit, Scikit-learn, LangGraph, ChromaDB, Groq AI, TF-IDF, Voting Ensembles

- Built a Bloom's Taxonomy classifier (91.19% accuracy, Logistic Regression + Random Forest Voting Ensemble) and a TF-IDF-based difficulty predictor (Easy/Moderate/Hard).
- Built a 5-node LangGraph agent for autonomous gap analysis, identifying learning gaps and generating targeted assessment recommendations.
- Implemented an evidence-based RAG pipeline with ChromaDB, grounded in 10+ educational frameworks for context-aware outputs.

TECHNICAL SKILLS

AI / ML: Generative AI, LangGraph (Agentic Workflows), Multi-Agent Orchestration, RAG, Google Gemini API, ChromaDB, Scikit-learn, TF-IDF, Groq AI

Languages: Python, C++, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Next.js, React, Node.js, Express.js, FastAPI, Tailwind CSS, Streamlit

Databases & Data Tools: MySQL, PostgreSQL, MongoDB, NoSQL, Excel, Tableau

Other: API Testing, JWT Auth, CI/CD, Figma, Data Structures
